our partners

Strategic partnerships are vital to our business. As such, we have cultivated strong relationships with leaders in the IT world and offer solutions leveraged on their current and emerging technologies.

We also have demonstrated success at teaming with firms whose skill and expertise complement our core competencies. Our strategy is to meet the needs of our clients, first and foremost, and we have proactively pursued new business opportunities along with those firms with which we share a common philosophy.

Let VTC design a solution for you today!

We are committed to delivering quality professional services to our customers and developing innovative solutions at a reasonable cost. Our approach to drive customer success is straightforward and very effective. VTC provides the most qualified staff at competitive rates while effectively serving our customers and embracing their challenges as our own.

our services

Program and Project Management

We've developed an understanding of industry best practices and how to achieve success with traditional and innovative approaches. We align these with the strategic needs of our partners to improve productivity and establish a backdrop for continuous improvement.

Security Consulting

As cyber attackers become more efficient at evading defenses, it is incumbent upon agencies to adopt more agile tactics in fending off threats. Our security engineers are experienced and consistently are educated on the top solutions. Our primary goal is to ensure our customers are protected from all current and future security threats.

Software Engineering

A science and an art. We begin by using innovative agile methodologies and best practices. The result - our engineers are able to rapidly develop, test, and deploy production quality code in a very short time table.

IT Staffing Services

We provide timely and flexible IT staffing solutions that aid our partners to increased efficiencies. Our team is comprised of reliable, experienced professionals prepared to help you meet your rapidly evolving business initiatives. We recruit and screen high-caliber talent, giving our partners swift access to 'right-fit' staff whenever, and wherever, needed.
