

our focus

VTC's core abilities center on data storage, backup/recovery, and security. We developed a business strategy leveraging our expert-level understanding of EMC storage and backup technologies, as well as those of EMC's partner ecosystem (VMware, Isilon, Cisco, RSA, Pivotal), to include a complete grasp of how those technologies impact any adjacent infrastructure. That same focus has directed the assembly of our workforce. The VTC sales, operations, and design/delivery teams are comprised of highly skilled administrators and engineers who bring nearly 200 years of industry experience, and product specific knowledge, to our various worksites each day.

past performance

- o Program and IT Management for the US Department of Health & Human Services at the Agency for Healthcare Research & Quality (Rockville, MD)
- o Manage Virtualized Server Environment
- o Management of Backup Environment

VTC engineers deployed to Christus' Irving, TX location responsible for:

- o Provisioning and management of 100+ virtual systems.
- o Configuration and mapping of RDM and RecoverPoint.
- o Management of VMware systems (provisioning and configuration of the cluster) in support of Christus' Meditech upgrade project.

'Visionary Technology Consultants is a very impressive firm. The knowledge possessed by their technologists, combined with the responsiveness and attention to detail displayed by the administrative team, make them one of our most trusted partners. We are extremely pleased with their work.'

Jim Mohler
VP, Service Design &
Delivery
NTT America, Inc

"The group over at VTC definitely has their stuff together. Sharp, knowledgeable, and ever available (a must when working with my firm). They've always delivered when called upon by us. They truly have earned our business. We look forward to a long and rewarding partnership."

Our continued success in meeting customer expectations has helped us establish a reputation as a trusted and extremely proficient business partner. Consistently, we have proven our ability to rapidly design and deploy the most appropriate solution in any circumstance. That proficiency has helped us become among the preferred vendors for government customers like the National Science Foundation and the Office of Foreign Disaster Assistance, as well as federal systems integrators including SRA and General Dynamics.

our affiliations

teaming strategy

Visionary Technology Consultants mentors a variety of disadvantaged businesses, which include 8(a) firms, woman owned entities, and HUBzone concerns. Routinely, we partner with these companies on appropriate opportunities to support their efficiency and deliver well-rounded teams with tremendous past performance.

The Digital Universe is expanding...Our vision can help you navigate.
